Took AI Governance with Prof Alon and it was easily the best course I've taken in the program. We got to run an AI bias audit lab, was eye opening. Class is discussion heavy which I usually hate, but he runs it so it doesn't feel like dead air waiting for someone to talk, actually had fun talking! Would take anything he teaches.

Last class in CF. Prof is the best I have had. He could teach all the courses. Some of the classes I took didn't make sense, till he explained it again in class. He's normally on-campus and not online. The slides were amazing!

I had Prof for AppSec. I worked hard in this class and learned a lot. I have taken two classes with Prof Alon, and they are my top 2 classes of the entire program. Ranking 1 appsec, 2 networking, 3 netsec (Mak). I wish he taught all my classes!

This is a hard class but prof made it fun we even had a guest speaker! I looked up prof Alon, he has done so much. I liked how he had examples for each part of class on how to use the concepts, other classes stay so sciency with profs that never actually done anything except research. Prof Alon does both. Best I have had at Tandon.

Best class I've taken in grad school. It was tough but made learning fun again after some dry courses. Assignments were clear, and Alon is really fair about grades and extra credit, no favorites, which I appreciated as someone who doesn't speak up much. Got an A. Super proud of it. I graduated since, but was thinking back on this course!

By far my favorite professor. The course is intensive, but fun! This may not be popular, but I appreciate that Prof Alon made sure no one could weasel their way into a better grade - everything is laid out clear. I kinda enjoyed the reality check some students had that they actually have to study. I had to work hard in this class and loved it!

I took networking and was trying to find other courses that he teaches, shame I took appsec prior with a different instructor! Prof. Hillel-Tuch is amazing, I ranked him as easy, but that's only because he makes it easy, the material is challenging, but he takes the time to break it down and digest. Grading is very fair put in effort, do well.

Just finishing AppSec with Prof Alon. He is so incredibly good, I really loved his lectures. This is not an easy class if you are unprepared. He makes his lectures accessible for topics we may not be familiar with and is also really funny, which makes it fun. Labs are hard, quizzes are on the labs. Do the work and you'll be fine, no coasting.

I took computer networking last summer, and it was amazing. It was summer, so lectures got condensed, became longer, but Prof Alon made them so fun, you learn something new regardless of your skillset. I came in with over a decade of work experience, and there were things he covered I never properly understood before or knew to ask. Truly stellar!
