DIFFICULTY

5.0

Mandatory hurdle. Outdated curriculum (Prolog, SML/NJ, Scheme). Prof abdicates all grading to TAs who deny partial credit and penalize minor pedantic details. Post-semester communication is toxic and defensive; prof sends emails calling regrade or rounding requests "insulting." Final feedback is hidden behind summer Zoom walls. Rigid, unyielding.

Last Updated on: Jun 4th, 2026

Languages we focus on are based on their contributions to the field, not necessarily their popularity. The graders are Ph.D. students and grades can be challenged. Partial credit is definitively offered. Asking for regrades is insulting when one hasn't

even seen the specific exam feedback they are contesting and assumes there is a grading fault.

He teaches well, but his tests were too hard. Maybe because they're open-book, he tends to test on the extra material he covers outside of the slides in class, so you'll need to take notes of what he said in class, but some of them weren't even mentioned during the lecture.

I took his PL and his class was fine. The topic is boring so you can't really blame the professor for boring lectures lol. I do feel like the things covered in class are not enough for HWs and tests, and his slides only help so much when it comes to reviewing. Take good notes and actually work on the homework should help. He is a nice person too.

While this subject matter was (for me) quite difficult, Professor Plock gives it an excellent treatment. He is both deeply knowledgeable with regard to the subject matter, and very willing to spend time clarifying concepts beyond the lecture time slot, which was extremely helpful (particularly while taking this online). Definitely recommended.

He would ask you to read dozens of pages of textbook every week - yes, he teaches Programming Language, not History or Literature! Unless you don't care about losing points in exams, you have to read them all! Also a lot of homework and very boring lectures.

Plock is a great lecturer for PL. His lectures are usually well-paced and not too heavy. He's got a great passion for programming languages and programming in general which comes through in the course. Managed to turn what would've been a fairly dry subject (who cares about old languages...) to an engaging fun class. Fair marker, tests are good.

Replies to emails quickly and gives detailed responses to your questions. A B grade should be well within reach if you put some work in. The curve was quite small but, honestly, the class isn't too difficult. HWs get easier and, for the exams, just study the slides. If you need to take PL, take it with him!

Cory Plock was the best professor I had while completing a MS in Computer Science at NYU. He introduced programming languages with a tremendous amount of expertise and compassion. His assignments and exams were very challenging, yet he consistently went above and beyond to provide support, giving guidance and detailed feedback. Thank you, Cory!

Plock is great in that he has excellent lectures with detailed explanations. However, contentwise, its a mishmash of seemingly unrelated topics with languages intertwined into the semester. Good for trivia, but bad for mastery. Prof didn't demo most of the languages covered. Hope you get a TA who will. Exam is cumulative. Study all bullet points

SKIP CLASS? YOU WON'T PASS.

I have taken course Programming Language with Professor Cory Plock. He is very planned with his lectures and is easy to follow. Lots of active participation in the class. He is very prompt in replying to queries through email and appointments. I would

definitely recommend this course in your first two semesters to get your basics strong about PL.

A poor professor. His teaching style is very ambiguous. Won't teach what you need to know in class. A very cold blooded guy. Would not recommend this course under him at all. BTW he thinks he is a great professor, so be ready for some snobbish behaviour. His final project is very vast and he has not taught many things which u will for the project.

On exams, he asks about every bullet point from the slides, and there are hundreds.. He also gives 0 partial credit even if an answer is fundamentally correct. On certain exam questions, it's forbidden to give any explanation for your answer. You just write a single line. No room at all for partial credit even if the question is worth a lot.

I am amused that easier courses can get higher score on ratemyprofessor. If you come here to find easy courses then this class is your choice. The professor superficially introduced several topics while none of them got deep. Grade is curved and inflated so even get lower grade you can finally enjoy the same grade with those have 96+ raw scores.
