CSCIUA201

Jun 2nd, 2026

For Credit: **Yes** Attendance: **Mandatory** Grade: **A** Textbook: **N/A**

He is very removed from teaching and will not give you any useful information during lecture (goes on random tangents). Recitation work was also very poorly organized as there were many mistakes in assignments throughout the semester. His only saving grace is that he gives very easy exams and that's pretty much it.

1.0

Gives very little homework. CS201 is a very low effort class that mainly serves as an intro to the next one in the sequence. The professor presents the content pretty well.

DIFFICULTY

3.0

There are few homework assignments, but they are really easy. The professor will teach you many things about basic knowledge about C and assembly code. Three exams, not hard, but need to spending time to prepare. If you are willing to spend 10 hours weekly on this course, you will get A for sure. Good professor Overall.

Not a harsh grader overall at all, and is also able to explain questions if you ask him. However he is not super active in teaching in my opinion.

He is a good professor. He clearly has a good grasp of the subject matter he teaches. Not that this is course-related, but seeing antivirus popups and slow maneuvering through the operating system is a turnoff. Lectures are boring boring but the rest is easy. He and the tutor will answer all additional questions and give tons of examples.

DIFFICULTY

3.0

His lectures are extremely boring and you will end up teaching yourself everything. He can get frustrated when no one is paying attention or participating. Exams are fine and he's not a super harsh grader. The material is already boring on it's own but Moody definitely doesn't make it better. He's nice but wish I took a different prof.

DIFFICULTY

4.0

Lectures can be a bit boring, but his grading is very generous. Graded on 4 programming projects, 4 "mini-exams", and recitation assignments (completion-based). Lowest of all exams dropped. No other hw. He's caring and tries to clarify concepts. Not sure I'd take again tho.

Shore fest, bad professor when it comes to teaching. The class is unorganized so we can't even teach the material to ourselves when moody fails (80% of the time). The homework is often broken. Skip this professor. Nice guy tho

read the slides carefully then u can get an A easily. the way he teaches was quite boring and most concepts he covered were explained much clearer and better in Chatgpt. don't take him if you really want to understand more about this topic.

This course is meant to be one of the easier CS courses, however the professor made it unnecessarily hard for students to get an A. If you enjoy self teaching then you will love this course because he is so unclear during lectures and does not have a clear grading criteria for exams. Take a different section with a better prof if possible, or wait.

I've graduated but was looking through some OS concepts and found my CSO notes when taking this class. Douglas is one of the best professors I had at NYU. The class was fun but test heavy - had three midterms and two mini exams for final but overall the exams are well within the scope of what he taught in class (and everything is in his notes).
