super nice chill guy. he's understanding and explains concepts clearly but his lectures go fast and the quizzes/tests are extremely difficult to complete on time. for the final, we had 5 coding questions and 20 MC. btw, for the coding questions, little partial credit is awarded so if u make a silly mistake u aint getting no credit for that question.

Homeworks are trippy, lectures are trippy. super chill nice guy though. i thought the quizzes were also bad, theres like a 25 minute time limit for 6 questions and he'll be talking for like 10 of those minutes.

Professor Versoza's lectures are super fast-paced so a lot of the time you have to go back outside of class or while doing the homework to understand what is going on. But, he drops a homework and a quiz and you can tell he definitely cares and wants everyone to get a good grade.

if you don't have a solid background in python(data in gen) don't take this course. he goes wayyyyy to quickly for anyone who doesn't at least do 4 leetcode problems a day. hw is insanely tedious and quizzes/exams designed to make you not finish. i won't say they're very hard but the workload is crazy. he cares abt us but not the best lecturer.

The man does not give you a chance to take notes. He goes lightning fast in lectures and expect everyone to already know what's going on. Only a snippet of the notes gets uploaded. Getting a response back from him for questions take ages or sometimes don't even respond.

Lectures go at a fast pace as others mentioned, overall a great professor who knows the content very well and is very accessible outside of class. Homeworks are well designed for real world application, expect to spend around 5hrs weekly. Exams are curved to an average around B. Highly recommend him for full stack!

Versoza is the best cs professor that I've had at NYU. His lectures are intense and he gets through an immense amount of material extremely quickly BUT if you are able to engage with him and take everything in it is so worth it to be there. The only thing to be careful of is that it (AIT) is homework heavy throughout the whole semester.

i love his teaching style & he's nice + understanding. BUT always look over notes BEFORE lectures bc he's fast. lots of hw and tests are anxiety-inducing but I learned a lot. the skills I learned in AIT helped me get an internship + I learned how to code fast bc of the amount of hw lol. take him if ur interested in fullstack/know some web dev stuff

VerGOATza Versoza gives more homework than most other CS4XX elective courses and that you should be prepared to spend anywhere between 6-10 hours a week (esp. AIT; DMA, not so much) However, the topics he covers in these classes lean toward applicable skills used in the industry, and I appreciate his lecture style. He also sounds like MKBHD

Yes, he is a nice person. But, his course sets you up for failure. Exams were tough, many students did not finish, homework takes anywhere between 6-10 hours a week, and lectures go at lightning speed, does NOT give you ANY time to take notes. Tests you on HTML when its not even taught in this class, he assumes you already mastered it prior.

Not hard & useful class, especially for those who work with databases and python. HWs take around 3-4 hours. In-class quizzes are announced in advance. Exams are a bit hard but not unmanageable, just go through slides and practice, nothing unexpected there.

If you don't have that much faith in your computer science skills, don't take his course no matter what. Most importantly, DON'T LISTEN TO THOSE who recommend his course because "at least he is a nice person". I'm not saying they are wrong, but I guarantee that you will regret your decision very deeply if you listen to them.

Ok at explaining topics but the course is very dense. Homeworks are reasonably easy. Exams are difficult and, by his admission, pretty much designed not to be finished. Especially bad because they make up ~55% of final grade. Course is designed as though it's project-focused, but isn't. Final project can be good for resume if you try though.

Somehow, each class he teaches becomes some sort of a race. You are ALWAYS playing catch up, because that's just how he designs his classes - he sets you up to fail. That to me is not good teaching, because students aren't learning anything. If you forget every single thing you learnt the moment you leave the exam hall, it's not actual knowledge.

I think he's a nice person, not the best prof with respect to exams and assignments. What he teaches in class is different from what you're graded on, he thinks students don't have other classes and other hw to deal with. Designs incredibly time consuming assignments for no apparent reason. Lmao I'm annoyed I didn't switch

Joe loves giving really difficult and useless exams. No matter how you did well in the projects. You have to face the truth you need to memorize all the trivial outdated knowledge of frontend and wrote all the answer within extremely limited time. And the exams took too much percent in grading. I sincerely recommend you not to take this course

Full stack is not easy, so giving a low score for it is too hard does not make sense. Indeed Prof.Versoza cannot explain everything and is far from explaining everything well. However it is not completely all his fault: with less than 3 hours of lectures in a week, it is just not possible for him to teach every detail of the material.
