DIFFICULTY

4.0

One of the worse teaching professors at NYU Courant, the teaching methods were pretty bad and unorganized, arrived at classes late, and changing teaching methods regularly.

This is the worst professor I have ever taken in my life. I cannot believe that this professor is allowed to teach at NYU. It is astounding the sheer incompetency of this professor at not only teaching the most basic of concepts, but also deciding to test us using questions that we're even more difficult than the problems given during our homework!

This course is designed for students in their final semester, so it is really difficult. It has a lot of homework, and sometimes you need to spend 10 hours to complete each assignment. You will have a group project on topics such as ML and LLMs. The final exam is definitely hard! This exam probably feels like a graduate-level course.

Worst part is the homeworks: a lot of the questions are based on libraries or repos that haven't been updated, so most time is spent rewriting/debugging code that is needed for you to start the homework. Lectures are boring but informative. Group project topic decided early, so hopefully you know some of this stuff or else you'll have no clue.

I used to think completing extremely heavy homework that took many nights and consumed 70% of my time this semester was the hardest part—until I took the final yesterday. I realized the homework was nothing compared to the final. How can the final for an undergraduate course be so ridiculously difficult?

Worst professor and class I have EVER taken at NYU. Class at 7:55-10:25 PM and it doesn't help that he has the charisma of a wet paper towel. Lectures are confusing and incomprehensible. Be prepared to pull all-nighters for every homework, do a lot of self-studying and get ~50% on the final. No option to drop late assignments or quizzes.

For Credit: **Yes** Attendance: **Mandatory** Grade: **Not sure yet** Textbook: **N/A**

DIFFICULTY

5.0

The content of the course is impractical and the prof pretty much reads off the slides. The class is disorganized and a lot of assignments and quizzes are thrown at you last minute. The coding sets take a good 4 days. The professor can be a bit tactless and does not seem to care about the students. The grading is tough and VERY unclear
